

DISCOVER THE ST. LAWRENCE SEAWAY

Brockville and the 1000 Islands region has gained critical acclaim as being the “World’s Best Fresh Water Scuba Diving” destination.

Part of the attraction to this site is the water clarity, there is no thermocline, and an average temperature of 70F.

OMG, Kelly gives this a two thumbs up!

This unique and rewarding diving experience offers exploration of century old shipwrecks and artifacts that are scattered along the river bottom.
